Why I Created Hitch-N-Ride:  
Solving a Real Problem in Livestock Transport

# *Why I Created Hitch-N-Ride: Solving a Real Problem in Livestock Transport!*

**Hitch-N-Ride was created to solve real challenges in Livestock transportation by connecting livestock owners with experienced, independent haulers.**

## *The Gap I Saw in Livestock Transportation:*

Whether it's a show steer coming home from a livestock auction, a horse purchased for a AQHA competition, or project animals headed to a new 4-H or FFA home, livestock transportation had traditionally relied on word-of-mouth, last minute calls, or hoping the right contact is available at the right time.

**That system leaves too much to chance.**

I saw a gap between **livestock owners who need dependable transport** and **independent haulers who are capable, experienced, and looking for consistent work** --but without an easy way to find each other.

# Livestock Transport is Personal

Livestock isn't cargo!

They're investments, responsibilities, and in many cases, part of the family!

From **show prospects, breeding stock, or your best friend**, every animal deserves to be transported by someone who understands proper handling, animal welfare, and the realities of the road.

I wanted to build a platform that respects that relationship — one that prioritizes safety, communication, and trust!

# Supporting Rural Families and Independent Haulers

**Hitch-N-Ride** was created not only for livestock owners, but also for the independent haulers who keep agriculture moving!

Many skilled transporters operate small businesses without the visibility or tools needed to grow.

At the same time, livestock families often struggle to find reliable help outside their immediate network.

**Hitch-N-Ride** brings these two groups together.

Strengthening rural connections while giving both sides a better experience.

# Built on Values, Not Just Technology.

This Platform wasn't built to chase trends or replace relationships.

It was built around values I grew up with:

**Honesty, accountability, hard work and respect for animals.**

**Hitch-N-Ride** exists to make livestock transport:

**More Transparent**

**More Accessible**

**More Dependable**

Without losing the human side  
of agriculture.

# *Why Hitch-N-Ride Matters:*

**Hitch-N-Ride** exists to support:

**Ranchers and Breeders starting new projects**

**Exhibitors traveling to shows and sales**

**Independent haulers building sustainable  
businesses**

It's about making sure livestock get where  
they're going safely

and that the people involved feel confident  
every step of the way.

If you're a livestock owner looking for dependable transport, or a hauler **Hitch-N-Ride** was built for you!

### *Looking Ahead:*

**Hitch-N-Ride** is still growing, but the purpose remains the same: to make livestock transportation easier, safer, and more reliable -- one connection at a time.

**Because how our animals  
get there matters!**

### *Disclaimer:*

*Information on Hitch-N-Ride.com is provided for educational purposes only. Livestock transport regulations vary by state and species and may change. Hitch-N-Ride does not issue paperwork or provide veterinary or legal advice. Always verify requirements with a licensed veterinarian and the destination state before transport.*
